

# Stanford Ringing Group

## STANFORD RINGING GROUP RECOVERIES and CONTROLS Reported in 2007

Note that whilst Welford is in Northamptonshire, our ringing site at Welford Tip is just inside Leicestershire.

Birds that we ring at one site and we then ourselves retrap at another of our own sites, are treated as controls. For example, Sand Martin P774554 was ringed by us at Dunton Bassett in 2002, controlled by us at our Huncote Sand Quarry site in 2006 and controlled again by us at Welford Sand Quarry in 2007

The symbols and conventions used are listed below:

Age when ringed: The figures do not represent years. Interpretation is as follows:

- 1 pullus (nestling or chick)  
fraction in brackets indicates total number of pullus ringed from those present
- 1J just fledged and found very close to nest
- 2 fully grown, year of hatching quite unknown
- 3 hatched during calendar year of ringing
- 3J hatched during calendar year of ringing, still partly or completely in juvenile body plumage
- 4 hatched before calendar year of ringing, but exact year unknown
- 5 hatched during previous calendar year
- 6 hatched before previous calendar year, but exact year unknown

Sex: M = male, F =female.

Condition at recovery:

- R caught and released by ringer
- RR alive and probably healthy, ring or colour marks read in the field by ringer
- V alive and probably healthy, caught and released but not by a ringer
- Xcat Killed by cat

### CONTROLS

<b>Mute Swan</b>	1J	14/9/02	Abbey Fields, Kenilworth
Darvic ZK1	RR (4)	10/11/07	Stanford Reservoir: 1883 days, 33 km
